REPORT

TOPIC Ground Radio Installation at Oggau and MargarethenEVALUATION PLACE OBTAINED 25X1DATE OF CONTENT DATE OBTAINED DATE PREPARED 15 November 1954 25X1REFERENCES PAGES 1 ENCLOSURES (NO. & TYPE) 25X1REMARKS This is UNEVALUATED 25X1
Information

25X1

1. Between 1100 and 1200 on 24 October 1954, the previously reported radar set of an unidentified type was still located 100 meters east of the Oggau station. ¹ 25X1
2. Between 1300 and 1330 on 24 October 1954, the Token-type radar set and the Fishnet-type set were still observed east of St. Margarethen. The sets were not in operation. No changes were observed on the two temporary buildings 100 meters west of the Token-type set which were used for quartering purposes, on the radio truck parked between the two buildings, or on the line extending between the Token-type set, the buildings and the radio truck. ²

1. Comment. The type of the radar set near Oggau has not been determined. The set which is located east of the mountain-chain probably belongs to the bombing range north of Neusiedler Lake. 25X1

2. Comment. Presumably an early warning set.
